

**Professor Mona Choi** is a faculty member at the College of Nursing, Yonsei University, where she has served since 2008. She earned her Bachelor of Science in Nursing from The Catholic University of Korea, followed by a Master's degree in Nursing Informatics from the University of Washington and a Ph.D. from the University of Maryland, Baltimore. She further completed a two-year Public Health Informatics Fellowship at the Centers for Disease Control and Prevention (CDC) in the United States.

Professor Choi currently serves as the Director of the JBI Yonsei Evidence-Based Nursing Center of Korea, and is a member of the Science and Technology in Aging Research Institute, a government-funded research center. She also serves on the editorial board of Healthcare Informatics Research, the official journal of the Korean Society of Medical Informatics.

Her research focuses on nursing informatics, including EMR data analysis, digital health, and artificial intelligence. She aims to generate real-world evidence and translate it into clinically applicable digital interventions. She is also actively engaged in advancing AI-based technologies for nursing documentation and healthcare workflow optimization.

## Education

PhD, University of Maryland, Baltimore, School of Nursing, Baltimore, MD, US (2006)

MN, University of Washington, School of Nursing, Seattle, WA, US (2000)

BSN, Catholic University, College of Nursing, Seoul, Korea (1994)

## Research career

2008 ~ present: Professor, Yonsei University College of Nursing

2006 – 2008: Public Health Informatics Fellow, Centers for Disease Control and Prevention, Atlanta, GA, US
